VERONIKA DERGAL

Product Manager | Building with AI | 10+ years solving problems with and for people

London, UK • +44 7830 791200 • dergalv@gmail.com • LinkedIn • My PM Portfolio

SUMMARY

I'm a practical product manager with a background in consulting and executive search. I build and ship tools using AI and no-code, but what I'm best at is people: earning engineers' trust, staying curious about what users need, and keeping complex stakeholders aligned. Now I'm looking for my next adventure, ideally a team of any size where I can bring clarity to ambiguous problems and keep the work efficient and to a high standard.

WORK EXPERIENCE

Product Intern, Odevo | London, UK Jul 2026 - Nov 2026

- Owned day-to-day product delivery for an internal KYC/AML compliance platform used across six of the group's businesses, working cross-functionally with engineering and group compliance.
- Led data migration to merge the SmartSearch accounts of two group businesses: scoped platform impact with engineering, managed the third-party vendor, and aligned stakeholders, without disrupting reporting.
- Re-platformed Client Risk Assessments onto the group's core screening system and decommissioned the legacy vendor, then drove CRA completeness from 60% toward 100% via bulk reassessment.
- Built automated matching of ~9,000 historical screening reports from the old vendor to subjects in the new system, with a review UI for weak matches, preserving the full compliance history through the migration.
- Ran discovery with frontline compliance officers through interviews and live workflow observations, translating insights into the product roadmap and regular product updates for the team.

Consultant, Veredus | London, UK Apr 2023 - Jan 2026

- Built an automation tool from 0→1 using AI and no-code tools (Lovable), integrating an API to pull publication data and screening it against role criteria. Cut manual research time by 70% (280 hours saved per project). Owned full product lifecycle: discovery, requirements, stakeholder buy-in, engineering collaboration, and team adoption.
- Introduced structured delivery and project tracking in Asana, improving visibility across concurrent projects and cutting admin by ~150 hours/year.

People Partner (HQ Teams), Fozzy Group | Kyiv, Ukraine Jan 2021 - Mar 2023

- Built an onboarding platform from 0→1, defining requirements, writing user stories, and collaborating with engineering and design to ship a welcome page with automated workflows and pulse surveys.
- Reduced new hire turnover from 29% → 18% in 12 months by improving early employee experience and using survey data to identify and address friction points.
- Adapted HR processes during wartime - retention and mental health initiatives under extreme constraints.

Associate, Odgers Berndtson | Kyiv, Ukraine Feb 2019 - Nov 2020

- Managed end-to-end executive search for C-suite roles. Placed 10+ senior executives in various sectors.

Consultant (People Advisory Services), EY | Kyiv, Ukraine Dec 2015 - Nov 2018

- Led enterprise transformation research and workshops for companies with 7K-60K employees.
- Conducted market research and competitive analysis on HR trends, EVPs, and workforce analytics.

EDUCATION & CERTIFICATES

BA, International Business Management 2011 - 2014

University of Lincoln, UK

IBM AI Product Manager 2026

Coursera, Professional Certificate - Verify

Recent courses: AI for everyone, Agentic AI (DeepLearning.AI); Analytics: Amplitude Foundations.

ADDITIONAL INFORMATION

Built with AI

- **Stride**: AI goal-setting app (live beta)
- **PM career hub:** scenario-based skill practice + job-pipeline tracking
- **10+ vibe-coded builds:** a memory game, a language learning tool, a recipe book, a ratio calculator

Product Tools: Jira, Confluence, Claude Code, Codex, Lovable, GitHub, Miro, Amplitude (certified), Loom, Synthesia.
Languages: English, Ukrainian.
